**ISO 9001-2000 Registered**

**Partnership In Safety**

In an effort to support our customers in maintaining the highest standards of safety, **The Carpenter Group and Your Company** agree to join in a **“Partnership In Safety”** by performing planned and methodical safety inspections, testing and safety training throughout the year.

We recognize the importance of maintaining the safest possible working environment and also realize that this is an ongoing process that will require a continual commitment to make this program viable. **The Carpenter Group** agrees to perform inspections of wire rope, rigging gear and all the *under the hook* lifting components on a regular scheduled basis as agreed upon with **Your Company**.

It will be the goal of **Your Company** and **The Carpenter Group** to maintain a safe and accident free work environment by adhering to applicable OSHA and ANSI standards and the removal of any questionable lifting devices from service.

Employees will be required to attend rigging inspection-training classes, sponsored and taught by **The Carpenter Group**, annually. Attendees will receive certificates of attendance and may be deemed “qualified” to perform on-site visual rigging inspections on a daily basis.

**The Carpenter Group** agrees to perform regular scheduled “proof tests” on rigging and lifting hardware in their testing facility and provide a **Certificate of Test** to all items that successfully meet required criteria. Calibration certificates of testing equipment are available upon request.

This document is an agreement to participate in a **“Partnership In Safety”** and is cancelable by either party, should criteria not be met.
